Competitive pressures and innovations in product and processes technologies challenge performance management systems in terms of their designs, their strategic and operational uses and their impacts on management and leadership. Particularly, organisations are paying close attention to the changing nature of

operations performance to the point that Operations Strategic Management Systems used for managing performance is the main focus of many redesign projects. The common belief is that there will be a positive impact on overall organisational performance if the performance management system is designed, or redesigned, appropriately.

We are interested in contributions that explore the processes of diffusion of innovations in management and performance of businesses, the drivers of their adoption and also the impact of new technologies on innovative behaviour and performance of businesses.

Subject Coverage:

This special issue of JGBA welcomes manuscripts including topics, but are not limited to, the following:

- Supply Chain Management**
- Production Management**
- Manufacturing Systems and MIS**
- Quality Management**
- Facilities Management**
- Innovation Management**
- Concurrent Engineering**
- Logistics**
- IT Management**
- Sustainability**
- Design Management**
- New Product Development**
- Strategic Management**

This special issue is aimed at encouraging scholars and practitioners from different disciplines to engage in a dynamic dialogue about diffusion of innovative practices in performance measurement and management of operations and businesses in the contemporary era of globalisation. International experience, peer dialogue, and mutual learning that will be facilitated by this special issue will benefit leaders and managers of Multinational Enterprises (MNEs) to review performance measurement frameworks and how

to facilitate the diffusion of innovative practices in their strategic business units across the world. This special issue invites papers with theoretical, practical orientation and interdisciplinary research.
